Serial No.: 10/092,171 GAU: 2636

Reply to Office Action of June 24, 2004

Amendment to the Specification:

ţ

Please replace the paragraph [0026] beginning at page 8 with the following rewritten paragraph:

[0026] For example, it may be determined that a thunderstorm is approaching and therefore has a weather characteristic of lightning, high winds and/or hail. A determination is then made of at least one device of a plurality of devices which is susceptible to determined characteristic 306. In the instance of lightening, for example, a modem may be determined as susceptible to both lightening strikes of telephones telephone lines and power lines, and therefore may be more susceptible to lightening than a game console connected through a power system of a receiver. Susceptibility of devices may be stored in a database which is accessible by the system of the present invention. The susceptibility of devices may be stored in the data database and include such information as to which weather characteristics the devices are susceptible, such as based on connection, location, and the like, and be arranged in a hierarchical format based on these characteristics for efficient searching.
